

**Claims:**

Claims 1-52 (canceled), and substitute new Claims 53-55, below.

53(new) An optronic/photonic device comprising:

at least one symbol etched or formed on the mirrors of  
MEMS switches, and;

at least one laser pulse, whereby the laser pulse is reflected from said  
mirror and forms a reflected laser pulse image of said symbol .

54(new) An optronic/photonic device comprising:

at least one symbol formed on the exit mirror of at least one laser, and;  
at least one laser pulse from said laser whereby said laser pulse is the laser  
pulse image of said symbol.

55(new) MEMS mirrors with symbols formed thereon, and;

laser exit mirrors with symbols formed thereon, whereby  
reflected laser pulses and laser pulses, respectively, form laser pulse  
images of the symbols.
